

AssetTrak

Protecting Your Valuable Assets 24/7

AssetTrak is a compact, reliable and cost effective GPS Security System to protect and manage all assets including passenger, commercial and marine vehicles as well as earthmoving and construction machinery. It offers real time information including routes, time spent on trips and on site, stop and go counts and security status can all be collected and monitored. Recognised as an effective anti-theft device, some insurers will waive the theft excess on any claim where AssetTrak is fitted and monitored.

AssetTrak is very simple to use. Once installed, you only need to arm it when leaving the vehicle or machinery unattended and the system then establishes a geographical security border. If it is moved out of its designated area, VisionTrak sends an alert to the control centre where operators will continually monitor the movement of the stolen property and can immediately alert the owner and/or the police.

Peace of mind guaranteed.

AssetTrack

Features

- ❖ 24/7 Security Monitoring Service
- ❖ 24hr Customer Alert of activity
- ❖ Infrared detector
- ❖ Sensor pressure pads (doormat style)
- ❖ Reed and temperature switches
- ❖ Door opening and glass break sensors
- ❖ Audible Siren
- ❖ Immobiliser integration
- ❖ Remote central locking
- ❖ Remote engine shutdown
- ❖ Panic button - SOS feature
- ❖ G-force, shock and tilt sensor
- ❖ Customer online tracking access
- ❖ Personalised safety zones
- ❖ Assisted Global Positioning System (AGPS)
- ❖ Quad band, works worldwide
- ❖ Real time location request
- ❖ Backup battery
- ❖ Low battery alert
- ❖ 2-way voice communication
- ❖ Location frequency upgrade for commercial tracking purposes
- ❖ Memory to store location and event data
- ❖ Actual speed and odometer reading
- ❖ Remote upgrade application
- ❖ Supports Dual SIM (subject to GSM provider)
- ❖ Land/Sea switch (Lat/Long positioning)
- ❖ Remote SMS programming
- ❖ Rugged designed, moisture resistant Anodised Aluminium housing
